CONTENTS, VOLUME 7

	Page
Bannister, M. H. An early progeny trial in *Pinus radiata* 1. Juvenile characters	316
Baylis, G. T. S. Host treatment and spore production by Endogone	173
Bullivant, S. *see* Ushiyama, R.	363
Butcher, J. A. Physiology of *Mycosphaerella macrospora* (Klebahn) Jorstad	142
Drury, D. G. and **Randal, J. M.** A numerical study of the variation in the New Zealand *Erechtites arguta–scaberula* complex (Senecioneae–Compositae)	56
Edgar, Elizabeth. Preface to *Characteres Generum Plantarum* by J. R. and G. Forster, 1776; a translation	311
Elliott, Ruth F. Growth of excised meristem-tips of kumara, *Ipomoea batatas* (Linn.) Poir in axenic culture	158
Evans, P. S. Intercalary growth in the aerial shoot of *Eleocharis acuta* R. Br. II. Development of the main internode	36
Franklin, D. A. Growth rings in rimu from south Westland terrace forest	177
Given, D. R. A synopsis of infrageneric categories in *Celmisia* (Astereae–Compositae)	400
Given, D. R. Taxonomic notes on the genus *Celmisia* (Compositae)	389
Godley, E. J. Additions and corrections to the flora of the Auckland and Campbell Islands	336
Harris, J. M. On the causes of spiral grain in corewood of radiata pine	189
Harris, W. Seed characters and organ size in the cytotaxonomy of *Rumex acetosella* L.	125
Hicks, D. H. and **Mitchell, K. J.** Flowering in pasture grasses 2. *Paspalum dilatatum* Poir	167
Hughes, S. J. New Zealand fungi 13. *Trichocladium* Harz	153
Index	427
McNabb, R. F. R. New Zealand Tremellales—III	241
McNabb, R. F. R. The Paxillaceae of New Zealand	349
Matthews, R. E. F. *see* **Ushiyama, R.**	363
Mitchell, K. J. *see* **Hicks, D. H.**	167
Moar, N. T. Pollen analysis of a surface sample from Antipodes Island	419
Moar, N. T. Possible long-distance transport of pollen to New Zealand	424
Moore, L. B. *Sprengelia incarnata* Sm.: an Australian plant in Fiordland	96
Penny, Pauline. The rate of response of excised stem segments to auxins	290
Philipson, W. R. *see* **Simpson, P. G.**	3
Randal, J. M. *see* **Drury, D. G.**	56
Rawlings, G. B. Fern records from Warawara Forest. A prostrate form of *Cyathea dealbata* and an extension of range for *Sphaerocionium lyallii*	100
Rook, D. A. The influence of growing temperature on photosynthesis and respiration of *Pinus radiata* seedlings	43
Sampson, F. B. Studies on the Monimiaceae II. Floral morphology of *Laurelia novae-zelandiae* A. Cunn. (subfamily Atherospermoideae)	214

Page

Scott, D. Effect of soil moisture tension on leaf elongation in *Poa caespitosa* 103
Scott, D. and **Wells, J. S.** Leaf orientation in barley, lupin, and lucerne stands 372
Shore, Brenda F. Dioecism in New Zealand Escalloniaceae 113
Simpson, P. G. and **Philipson, W. R.** Vascular anatomy in vegetative shoots of *Ripogonum scandens* Forst. (Smilacaceae) 3
Sykes, W. R. *Homalanthus* in New Zealand 302

Taylor, F. J. *Prasinocladus* in New Zealand 106
Taylor, J. B. Resistance in some *Malus* spp. to root canker caused by *Peniophora sacrata* 262
Taylor, J. B. Root-canker disease of apples caused by *Peniophora sacrata* 262

Ushiyama, R., Bullivant, S., and **Matthews, R. E. F.** A mycoplasma-like organism associated with *Phormium* Yellow Leaf Disease 363

Wardle, P. Biological flora of New Zealand 4. *Phyllocladus alpinus* Hook. F. (Podocarpaceae) Mountain Toatoa, Celery Pine 76
Wells, J. S. *see* **Scott, D.** 372
Wright, G. M. A developmentally unstable character in wheat: glume fertility 30
